

IN THE CLAIMS:

Cancel Claim 9 without prejudice.

## LISTING OF ALL APPLICABLE CLAIMS

Claim 1 (Original) An improved decoding and processing system for advanced determination and display of geographic information of a call origination party, said system comprising:

- a) a mobile switching center having means for receiving a CND message from a call origination party, said message containing call identification data from a signal derived from communication network;
- b) server means for storage and retrieval of specific data from a data base library for selectively determining the corresponding geographic information of said CND message received from the call origination party;
- c) means for wireless transmission of said corresponding geographic information for reception by a mobile handset; and
- d) a readout device for displaying the geographic information of the call origination party.

Claim 2 (Original) The improved system of Claim 1 wherein the corresponding geographic information is a city identification of the call origination party.

Claim 3 (Original) The improved system of Claim 1 wherein the corresponding geographic information is a state identification of the call origination party.

Claim 4 (Original) The improved system of Claim 1 wherein the corresponding geographic information is a country identification of the call origination party.

Claim 5 (Original) The improved system of Claim 1 wherein the corresponding geographic information is a province identification of the call origination party.

Claim 6 (Original) The improved system of Claim 1 wherein the corresponding geographic information is displayed pictorially.

Claim 7 (Original) The improved system of Claim 1 wherein the communication network is PSTN.

Claim 8 (Original) The improved system of Claim 1 wherein the communication network is an intra-network.

Claim 9 (Cancelled)

LISTING OF ALL APPLICABLE CLAIMS (Continued)

Claim 10 (Original) The improved system of claim 1 wherein the standard data field is a data field for a dialed number.

Claim 11 (Original) The improved system of claim 1 wherein the call data character stream replaces the contents of the standard data field.

Claim 12 (Original) The improved system of claim 1 wherein the call data character stream references information stored in a database.

Claim 13 (Original) The improved system of claim 1 wherein the call data character stream is used to process the voice path of the telephone call.
